

SPS-5W-5VLP

1st Aug, 2024, Rev1

This power supply module can be used to power from DIY to any industrial projects that need isolated AC to DC conversion. The module is capable of supplying full load current constantly for longer period. Thus, making it perfect choice for all types of loads.

With the aim to promote **MAKE IN INDIA**, this power supply module boasts following features:

Specifications:

1. Input supply voltage: 190V - 250VAC
2. Output Voltage: Isolated 5VDC
3. Output Current: 950 mA
4. Output Power: 5W
5. Output overload detection and trip at 1000 mA
6. Output short circuit protection
7. Higher efficiency
8. Low power consumption
